Hi Alexander

Heads up there is an issue with the link below on downloading the lab files.

Please use this: https://bltinc.com/LabAccessdd/a8c9f50f14c94195/VIVB1_VILT-Lab- Files.2019.1.zip.

It should download at the bottom.

Let me know if you have any issues.

COURSE MATERIALS

Course lab/presentation books have been shipped to you via (USPS | UPS | FedEx) to the address you entered at registration. If you do NOT receive your course materials at least 2 days prior to the start of class, please notify me.

LAB SETUP (This MUST be done in advance of the date of the class)

This is a standard class with lecture, demos, and labs. You will need Vivado 2019.1 installed and is strongly recommended to be fully licensed for the best user experience.

If you are using the freely available WebPACK version of Vivado for the course, note that all synthesis and simulation features are fully supported, but not all devices. If using WebPACK, simply substitute the device choice to XC7K70T* or XCKU035*. The specific speed grade and package won't matter.

Please download and install the following lab files prior to the start of class:
  1. Browse to https://bltinc.com/LabAccessdd/a8c9f50f14c94195/VIVB1_VILT-Lab- Files.2019.1.zip
  2. Create "training" folder under root directory, and extract lab files there: i.e. c:\training\<lab files>

CLASSROOM POLICIES

BLT will be recording this session.

Students may not use recording devices during the training.

AUDIO / VISUAL

BLT's instructors may use video/camera at various stages of the training. However, students do not need any camera/video inputs.

For maximum participation, each student should have a working microphone.

Students also have the option of calling into the meeting using your phone for audio connection.

Participation / Engagement

Students active participation throughout contributes to a better learning experience.

To best serve our online students, BLT requests that all attendees join with their name followed by their company name. Example: Name - Company

Students are initially muted to minimize noise and distortion; however, everyone is encouraged to unmute at any time to ask questions.

Students can also use the "raised hand" feature to indicate you have a question, and are waiting to be recognized by the instructor.

Finally, students can type their question(s) into the "chat" window and wait for the instructor to respond.

Any other specifics will be addressed by the instructor.

NOTE: This email is sent in text form to avoid being filtered.

If you have ANY other questions please don't hesitate to email or call.

We look forward to working with you.
